

Independent Inspections of raw cullet, the best start in process for recycle companies and glass factories.

Glass factories:

- As cullet becomes the most important raw material in your batch, it's time to devise an improved method of controlling and testing incoming cullet.
- Better control of raw cullet prevents later glass quality issues and customer complaints.
- Better quality cullet
- Quick flexible planning for cullet inspections
- The result the same day ready with photos and an extensive report
- Higher packed to melt and lower cost p/ton

Recycle companies:

- Quick flexible planning for cullet inspection
- Independent Inspection report of your recycled cullet, well known at all big Glass factories companies
- The result the same day ready with photos and an extensive report
- Professional personal with extensive know-how of cullet inspections
